ANCHORING  
ENTERPRISE  
TRANSFORMATION

# ABOUT US

Digital transformation succeeds when systems, processes, and people move together.

Established in 2018, we bring over 50+ years of combined, hands-on experience across IT digital transformation, ERP platforms, and reengineered business processes, grounded in a deep understanding of how organisations actually run today.

This practical insight shapes how we bring structure, aligning the right platforms with the right delivery models and the right talent, so systems perform consistently well beyond go-live. This approach has helped us grow from focused, hands-on delivery into a trusted execution partner across ERP, CRM, and enterprise platforms.

Everything we do is guided by one simple principle: **systems must remain dependable as organisations evolve.**

## Our Proven Experience Measured in Numbers

**50+**

**Years** of overall IT & ERP leadership experience

**35+**

**Projects** delivered across ERP and enterprise IT

**25+**

**Client partnerships** built to last

**8+**

**Industries** across complex environments

“

They understood our delivery environment quickly and aligned the right talent to our operating standards. The staffing support helped us scale critical initiatives without disruption, while maintaining consistent quality throughout.

– Director, Technology & Transformation | Big 4 Consulting Firm

“

The implementation was structured and business-aligned, with minimal impact on plant operations. Post go-live, their AMC support kept systems stable and predictable, focused on continuity rather than reactive fixes.

– Head of IT & Operations | Manufacturing Enterprise

# ODOO ERP SOLUTIONS

Odoo brings core business functions onto a single, connected platform, allowing organisations to run operations with shared data and clear visibility. Its modular structure makes it practical to adopt gradually, scale confidently, and adapt processes without unnecessary complexity.

#### Deploy

Cutover planning · Go-live execution · Hypercare

#### Operate

Application support & managed services · Optimisation · Continuous improvements

**Focused on control, compliance, and long-term operational reliability.**

# HOW WE DELIVER WITH CONTROL AND PREDICTABILITY

HOW IT WORKS	WHAT MANUFACTURERS GAIN
Requirement & workflow mapping	Clear execution scope from day one
Dedicated delivery pod mobilisation	Accountable teams, not fragmented resources
Documentation-led onboarding	Faster alignment across plant and business teams
Milestone-based governance cadence	Predictable progress with delivery control
Controlled go-live + stabilisation support	Reduced disruption and operational continuity

## Industry Expertise
